

Cirrus Stone Heaters

SAWO's Cirrus stone heaters are available in two models – Cirrus and the new trendy Cirrus Rock

Cirrus Soapstone
(CIR)

Cirrus Rock
(CRR)

Cirrus Stone Heaters

Cirrus is a soapstone heater with a stylish slim design. Cirrus represents modern heater technology that combines Finnish soapstones and traditional sauna rocks. The heater's smart design and the uniquely designed soapstones with water pockets assures that a larger surface area of rocks comes in contact with the water, releasing more steam evenly throughout the sauna room.

The new Cirrus Rock is a modified model of Cirrus. With shorter safety distances the Cirrus Rock's robust design and stainless steel frame represents the new, trendy heaters with large volumes of sauna rocks. Likewise Cirrus, Cirrus Rock ensures that a larger surface area of rocks comes into contact with water, releasing more steam evenly in every direction.

Note: Sauna stones and decorative soap stone cubes are not included.

Technical Data

Model Name	Power (kW)	Sauna Room(m3)		Supply Voltage	Fuse Size (Ampere)	Control	Size of Heater (mm)			Soapstones (kg)	Stones (kg)
		min	max				Width	Depth	Height
